PROJECTS

Resort Website

Designed and developed a modern, responsive website-
. Created an engaging user interface with interactive elements including room listings, gallery views, and a booking form.

[Live Demo](#) —

Traffic Management System

Built an automated Traffic Management System simulation using Python.

Library Management System

Developed a full-featured desktop application for managing library workflows using Java (Swing) and MySQL.

Ry Pheaneak

I am an aspiring Full-Stack Developer capable of building cross-platform digital solutions from the ground up — from UI/UX prototyping in Figma to responsive web layouts and mobile application development. Skilled at writing clean, efficient, and maintainable code across diverse platforms using HTML, CSS, JavaScript, Python, Java, Flutter, and Dart. A fast learner, detail-oriented problem-solver, and proactive team player passionate about leveraging modern software practices to build impactful real-world applications.
